Problem Solving

Avijit Kumar Sharma

Full Stack Web Developer

Professional Summary

Results-driven Full Stack Web Developer with expertise in JavaScript and the MERN stack. Proficient in Node.js, Express.js, and React.js for building scalable and efficient web applications. Skilled in database design and optimization using MongoDB. Collaborative team player with a passion for staying current with industry trends. Excited to contribute technical excellence and problem-solving skills to innovative projects.

Projects

Myntra Clone   Live Demo Link   Github Repo Link

HTML   CSS   JavaScript   Bootstrap

- Developed a Myntra clone, an e-commerce platform for fashion and lifestyle products
- Built the product listing page with sorting and filtering functionalities
- Implemented user authentication and login functionality
- Enabled users to add items to wishlist and cart
- Implemented promo code functionality for discounts
- Participated in the entire project, collaborating with team members

TaxTim   Live Demo Link   Github Repo Link

HTML   CSS   REACT-JS   CHAKRA-UI

- Developed a full stack web application using the MERN stack (MongoDB, Express.js, React.js, Node.js) to provide users with an automated tax return filing process.
- Designed and developed frontend components using React.js to ensure a seamless user interface and enhanced user experience.
- "TaxTim" simplifies tax filing for individuals and businesses through an easy online platform.
